Creative Giving is perfect for church leaders who have no expertise in the area of planned and creative giving. This book helps non-experts to think about estate planning and stewardship within the ministry and mission of the church. A comprehensive guide, *Creative Giving* helps church leaders understand the transfer of wealth through planned giving. The authors give leaders the tools to develop a creative giving program within the congregation.

This book is loaded with sample documents, models and stories. There is even a sample workshop outline and timeline!
